LGNC

«ENDLESS HEAT»

LGNC unveils its new collection «Endless Heat». Still conscious of the world around them, the designers create an utopian, metaphorical women's wardrobe evolving through a world in the throes of climate disruption. Far from being a depressing depiction of reality, the collection brings a whole wardrobe to complete our last capsule collection «24h on a burning earth».

The brand tries to perpetuate its codes through materials and cuts: comfort, protection, retro futurism ; still with the desire to create timeless garments.

Especially in our current climate, our motto: STREET CARE makes perfect sense.

Here, LGNC proposes its ideal wardrobe for living in tune with the times.
